

Hosted File Server and Backup

The Hosted File Server and Backup solution allows churches to access online storage as a network drive to allow users to drag & drop, share files with others, edit files directly to the drive, and copy files back to your machine just as easily. From there, accessing those files from anywhere is as easy as logging into an account.

With the Hosted File Server solution, church staff gains the reliability and peace-of-mind of regular backups of critical files with the included Backup solution. Automatic backups are stored in a separate, secure area of your online disk, distinct from the network drive and offers efficiency and performance features such as compression and de-duplication.

Features:

- ✓ Synchronized Cloud Based Storage allows you access to your files instantly anywhere.
- ✓ Access your files from your iPhone, iPad, or Android device.
- ✓ Share files with other users easily.
- ✓ Keeps local folder synced, allowing you to work on files without a connection.
- ✓ Easily manage backup of critical files.
- ✓ 100 GB of shareable cloud storage included.
- ✓ Geographically dispersed storage vaults with 128-bit AES encryption — the same level of protection used for online financial transactions.
- ✓ Works with Windows and Apple Computers.
- ✓ Off site backup of files.
- ✓ Unlimited 8am-5pm M-F Technical Support.

Hosted File Server Pricing	
Hosted File Server and Backup	\$5.95 per month per user*
One Time Setup Fee	\$25.00 per user
Additional Storage (100 GB Increments)	\$0.18 a GB per month

*Service requires a 12 month agreement and 3 user minimum.

How to get started:

Contact Covenant Technologies by sending a request to CovTech@CovChurch.org. We will work with you to assess how much data you actually need to store, clarifying the costs and benefits for your specific environment.
