Workstation Protection

As you begin to push administrative tasks and communication to web based methods, protecting the hardware and software assets of a church becomes increasingly important.

The Workstation Protection anti-virus solution provides an affordable, easy to use and full-featured solution for protecting important information from being damaged by malicious attacks. We monitor for intrusions and become immediately notified for proactive defense.

Our Enterprise-grade solution prevents against all known methods for digital intrusion and gives churches the peace of mind that their data is safe from Viruses, Malware, Phishing and other risks.

Features:

✔ Enterprise-grade Protection for Windows.

✔ Protects against Viruses, Malware and Rootkits.

✔ Protects against Spam, Phishing and Malicious URLs.

✔ Software protects against threats from removable drives, such as flash drives.

✔ Any threats or quarantined files will notify our support for proactive defense.

✔ Vipre Client enhances built in Windows firewall.

✔ Unlimited 8am-5pm M-F Technical Support.

Workstation Protection Pricing	
Managed Anti-virus Solution	$4.00 per user per month
One Time Setup Fee Per User	$25.00 one-time fee per user

How to get started:

Contact Covenant Technologies by sending a request to CovTech@CovChurch.org. We will work with you to access the number of computers you need protected and make recommendations on how to best protect your assets. Once determined, we will assist in implementing the solution and provide a single source for billing and support.
