

## Email & Apps

The Email and Apps solution from Covenant Technologies, built on Google Apps™, offers communication, collaboration and publishing tools for churches. Google Apps includes email, calendaring, documents and forms/surveys at its core, with many additional services available through the Google Marketplace. Covenant Technologies will assist in developing an appropriate solution for your churches needs.

Google Apps is a suite of applications that live in the cloud. The advantage to a cloud based solution is that it is accessible from any computer or device with an internet connection. This freedom of access enables easier communication and collaboration and also prevents any loss of data due to hardware failure.

With Google Apps, your church can decrease its total cost of ownership and offer staff the very latest innovations from Google. It's quick and easy to get started as Covenant Technologies acts as a dedicated IT staff to get you up and running.

Through a series of deployment steps, Covenant Technologies, in most cases, can transfer existing email, contacts and calendars.

### Features:

- ✓ Collaborate via email, documents, questionnaires/surveys, and calendaring.
- ✓ Move your church from web based email addresses (i.e. @yahoo.com, @hotmail.com, etc.) to a professionally managed unique domain.
- ✓ Reduced Cost over traditional email and collaboration methods.
- ✓ Complete hosted solution, no onsite server required.
- ✓ Custom domain based email.
- ✓ We will transition email, contacts and calendar from previous system.
- ✓ Unlimited Support 8am-5pm Monday -Friday

# Focus on ministry, not technology.

The superior quality of our solutions and our world-class technical support will allow you to spend time and resources on what really matters.

## How to get started:

Contact Covenant Technologies by sending a request to [CovTech@CovChurch.org](mailto:CovTech@CovChurch.org). We will discuss the options for transitioning from your legacy system to Google Apps™ and help you develop a deployment plan. Covenant Technologies will assist in establishing users, migrating data and setting up mail clients and mobile devices.

Email and Apps Pricing from Web Based Mail/New System	
Email & Apps Support Subscription	\$25 annually per user
Per User Setup Fee	\$25 one time per user
Domain Registration	\$12 annually
Per User Setup Costs and Domain Registration fees waived for churches who bundle Email and Apps with Web Presence offering.	
Email and Apps from Premise Based System	
Email & Apps Support Subscription	\$25 annually per user
Migrate Premise Based Email	Priced on a Individual Case Basis Starts at \$500

## Additional Information:

Google waives the annual fee for qualifying non-profits. This is separate from the support subscription, and subject to approval from Google. We will help your organization submit for Google Apps for non-profit, during our setup process. Some organizations may not qualify and are subject to additional subscription fees.

\$25 per user setup fees include migration from web based mail only and “start from scratch” systems. We will import your previous system’s address book, inbox and calendar if possible. Previous system must support POP or IMAP mail to export data.

Enterprise and Premise systems like MS Exchange, Groupwise, and Lotus are quoted on individual case basis. Contact Covenant Technologies at [covtech@covchurch.org](mailto:covtech@covchurch.org) to get started. We will cover your Email and App needs, discuss transition steps, and help you prepare to transition into the new system.
